[Upgrading An Active Directory Domain From Windows Server 2008 Or Windows Server 2008 R2 To Windows Server 2012 Or Windows Server 2012 R2](#)

A screenshot of a Windows PowerShell window titled "Administrator: Windows PowerShell". The window shows command-line output for upgrading an Active Directory domain. The commands used are Get-ADDomain and Get-ADForest, both filtered by Name and DomainMode or ForestMode respectively. The output indicates the domain name is "rebeladmin" and its mode is "Windows2012R2Domain". The forest mode is also shown as "Windows2012R2Forest".
